

WATERSPAR ENAMEL

QUICK DRYING

Waterspar Enamel may be used in and about the home for refinishing furniture of all kinds, for standing trim and on interior floors. It has a pleasant odor during application and drying, and its chinalike gloss surface will not be marred by frequent washing. It dries for use in four hours.

DIRECTIONS FOR USE

*Stir contents thoroughly from
the bottom*

Preparation of Surface

The surface to be finished must be thoroughly cleaned and free from oil, dirt and grease. Use Turpentine for removing wax and grease. Work over entire surface with sandpaper removing all old, loose paint. Dust thoroughly.

Application

One coat will cover any old painted surface. On new work apply two coats of Enamel, allowing four hours drying between coats or apply a coat of 54-97 Flat White Undercoater reduced with about one pint of Turpentine to the gallon and after drying, sand lightly and apply Enamel of selected color. If necessary thin Enamel slightly with Leptyne or Turpentine.

Successful painting requires the use of the proper brush.

USE A GOLD STRIPE BRUSH.

COLOR

The colors in the Waterspar Enamel line were selected after a thorough study of modern color trends and preferences. They are the colors in popular demand today, the pick of hundreds of shades. Any one of them can be chosen with perfect confidence that it will result in a decorative effect within the realm of good taste. They are excellent trim colors for the most modern type of interior decorative wall colors, such as Wallhide.

In naming Waterspar colors descriptive names were chosen. It is realized that colors and their names are largely the association of ideas, and many people might name these same colors differently and still be correct.

The following table shows the name of the color chosen and variations which might also identify the colors:

54-57 TRUE IVORY Eggshell Antique White Light Cream	54-67 PEARL GRAY Platinum Warm Gray Dawn Gray Putty
